

ETS 4.10.0 Release Notes

FDIC Users: For the latest ETS News and Information, please see the [ETS RMS Website](#)

Release Type

☐ Major ☒ Minor ☒ Bug fixes

What's New (release 4.10.0)

This release includes minor enhancements and bug fixes, including, but not limited to:

Enhancements:

1. Classifications: Provide ability to bulk classify Accrued Interest and Unfunded Commitments for Group and Discuss Only Loans
2. Resource Library: Only download new or updated templates, versus downloading all templates, when applicable.
3. Linesheet: Move Note Purpose (commonly known to as "Loan Purpose") from the Supplemental Loan Information into the Loan Information section.

Bug Fixes:

1. Resolved a known issue when attempting to print linesheets for Contingent Liabilities or Printing Blank Linesheet for CL, users are prompted to enter DB credentials.
2. Resolved an issue when printing linesheets for most non-loan asset types (Securities, CL, Other Assets), comments entered in the "Findings and Classifications" and "General Information" dialog boxes do not print correctly. (ORE linesheet resolution in process)
3. Resolved a collaboration issue where large certificate package causes timeout while processing data from Central Peer.

Third-Party Software Updates:

1. *SAP Crystal Reports*: Product used for viewing reports within ETS or printing linesheets. Product version upgrade from Service Pack 18 to Service Pack 37 (SP37). Clients **must** upgrade this component before attempting to update ETS to v4.10. Warning message will appear to users when opening the application if SP37 is not detected.
2. *PDFTron PDFNet Print Driver*: This product was recently rebranded to a new name, Apryse PDFNet Print Driver, but the functionality remains the same. This software allows ETS users to export documents to a PDF Print Driver and also view PDFs within the ETS application. Users should upgrade this component before attempting to update ETS to v4.10.
